

ANDOJU SIDHU GANESH CHARY

Software Engineer | Full-Stack Developer (MERN)

Hyderabad, Telangana, India | +91-9704733035 | andojusidhuganeshchary@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and Database Management, and hands-on experience building full-stack, production-grade applications on the MERN stack. Proven ability to design scalable REST APIs, secure authentication systems, and AI/ML-powered features — including computer vision applications — end to end. Seeking a Software Engineering role at a product-based company to apply strong CS fundamentals and engineering ownership to build reliable, large-scale systems.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Software Engineering, System Design Fundamentals

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture

Databases: MongoDB, MySQL, Supabase

Machine Learning & CV: TensorFlow.js, MediaPipe, OpenCV, Computer Vision, Real-Time Inference

Tools & Practices: Git, GitHub, VS Code, Agile, CI/CD basics (Netlify, Vercel)

EXPERIENCE

Full-Stack Developer Intern | Unified Mentor Pvt Ltd

Jan 2025 – Mar 2025

- Engineered and shipped 4+ production-ready full-stack applications end to end using React.js, Node.js, Express.js, and MongoDB.
- Architected scalable RESTful APIs with JWT-based authentication and role-based authorization, following clean MVC design principles.
- Improved frontend performance through lazy loading and code splitting.

Frontend Developer Intern | Cognifyz Technologies

Jul 2025 – Aug 2025

- Built responsive, cross-browser web interfaces using HTML, CSS, JavaScript, and React, improving usability across devices.
- Integrated frontend components with backend REST APIs and optimized application performance across major browsers.
- Implemented role-based authorization and secure authentication flows, strengthening application security posture.

PROJECTS

AI-Powered Real-Time Fitness Coach | React, Node.js, Express, TensorFlow.js, MediaPipe, OpenCV, MongoDB

- Built a full-stack AI fitness application that detects exercise posture in real time using computer vision and machine learning models.
- Implemented automatic repetition counting and live form-correction feedback using TensorFlow.js and MediaPipe pose estimation.
- Designed the React frontend and Node.js/Express backend to stream inference results and persist workout data in MongoDB.

MERN E-Commerce Platform | React.js, Node.js, Express.js, MongoDB, JWT

- Designed and built a full-stack e-commerce platform with user authentication, shopping cart, and payment integration.
- Developed an admin dashboard for product, order, and user management, and optimized MongoDB queries for faster retrieval.
- Optimized MongoDB queries for faster data retrieval and deployed the application using Netlify (frontend) and Vercel (backend).

AI-Based Attendance Management System | Python, OpenCV, Flask, Supabase

- Designed a real-time face recognition system to automate attendance capture, removing manual tracking overhead.
- Implemented secure authentication, attendance tracking, and reporting, and optimized backend APIs for real-time responsiveness.
- Optimized backend APIs and database queries to improve system responsiveness under repeated real-time requests.

EDUCATION

Bachelor of Engineering, Computer Science & Engineering

2023 – 2027

Sri Indu College of Engineering and Technology

CERTIFICATIONS

- Python (HackerRank)
- Database Management Systems & Programming in Java – 94% (NPTEL, IIT Kharagpur)
- React JS Certification (Infosys)

LEADERSHIP & ACHIEVEMENTS

- Scored 94% in NPTEL's Programming in Java, reflecting strong OOP and analytical problem-solving skills.
- Led campus technical events involving 200+ participants and coordinated event planning, problem design, and execution.
